

VeriLearn

AI LEARNING AUTHENTICITY EVALUATOR

Empowering Educators with Oral-Style Conceptual Verification

Redefining Integrity

Moving beyond simple AI detection to measure genuine conceptual understanding through real-time, personalized questioning.

| Mission-Critical Objectives

Conceptual Clarity

Detect copy-paste or AI-generated submissions by challenging students to explain logic in their own words.

Objective Scoring

Produce a data-driven Understanding Score (0–100) based on terminology, depth, and application.

Universal Access

Support for English and Urdu (RTL) interfaces with a serverless, browser-only architecture.

| Modern Technology Stack

- **Claude 3.5 Sonnet:** Driving core analysis, question generation, and final reporting.
- **Vanilla JS SPA:** Zero framework dependency for lightning-fast, secure execution.
- **Anthropic API:** Direct browser integration via dangerous-direct-browser-access.
- **CSS Variables:** Consistent "Dark Academic" theme across all 5 app screens.

| The 5-Screen User Flow

Screen 3: The Viva Session

“Test real understanding, not just memorization.”

- **90s Countdown:** Encourages rapid, intuitive responses to prevent external AI usage.
- **Dynamic Follow-ups:** Questions adapt based on previous answer quality.
- **Visual Cues:** 5-dot progress bar and real-time timer color shifts.

| Intelligent Scoring Thresholds

Scores are generated per-question by Claude, analyzing nuance and terminology usage.

| The API Orchestration Layer

API CALL	SYSTEM ROLE	KEY OUTPUT
Analysis	Academic Evaluator	Key Concepts & AI Risk Summary
Question Gen	University Professor	5 Tailored Viva Questions
Evaluation	Honest Viva Judge	Per-Answer Score (0-10) & Feedback
Final Report	Academic Registrar	Authenticity Verdict & Recommendations

| Performance Metrics Taxonomy

METRIC_TAXONOMY_WEIGHTS: BALANCED_25%_DISTRIBUTION

| Comprehensive Reporting

Authentic Verdict

Actionable Feedback

The final report doesn't just score; it explains. Strengths are highlighted with , while weaknesses are flagged with .

Includes a printable PDF-ready stylesheet for institutional records.

| Multilingual Engineering

Bi-Directional UI

Seamless toggle between English (LTR) and Urdu (RTL) without reloading the page.

Mixed Input

Urdu support for questions/UI while maintaining LTR code/English input capability.

Universal Strings

Unified "T" object state ensures UI consistency regardless of the selected locale.

Questions?

The Future of Learning Authenticity is Collaborative.
